

ONIGAMING FIRST NATION

2020 HOUSING RECOGNITION AWARD RECIPIENT

Onigaming First Nation continuously strives to build capacity in their community. Over the years the community's accomplishments in housing development is a testament to these efforts. In recent years, with assistance from Indigenous

Services Canada Budget 2016, Onigaming has built several new homes. Throughout this process the community has remained committed to employing local carpenters. In addition, Onigaming welcomes young carpenters and students on construction jobs, where they teach and encourage best practices in proper home building techniques. This has allowed Onigaming to create a local and sustainable workforce.

In addition Onigaming has found ways to continue to improve their housing practices. For example, they have recently implemented housing database software through the Indigenous Services Canada Capacity Development fund.

These housing projects have had many positive effects on the community, both in terms of creating safe and sustainable housing, and providing employment and training for community members.

For these achievement Onigaming First Nation is being awarded a Community Housing Recognition Award for 2020.

CONGRATULATIONS TO ONIGAMING FIRST NATION!
